

# If you:

- Eat fast foods or eat in restaurants
- Eat packaged or processed foods
- Eat foods containing corn, soy, canola, cottonseed oil, sugar beets, aspartame (NutraSweet®) and milk/milk products
- Know anyone with allergies, antibiotic resistant disease, cancer, IBD, Crohn's disease, celiac disease, colitis, sterility, megacolon, leaky gut syndrome or other digestive disorders

**Then you need to listen to this CD to protect you, your family and your pets**

Why eating genetically modified (GM) food is gambling with your health in every bite. This lecture, presented by Jeffrey Smith (September 2007), outlines the evidence of health risks linked to genetically engineered foods (GE) and the reasons why the current generation of GM foods are inherently dangerous.
