BioPreparation and SLO

*Cassie is a 7 year old German Shepherd. Vets at Cornell Hospital said she has **SLO (symmetrical lupoid onychodystrophy)** because 7 of her nails fell off. SLO is thought to be an **autoimmune disease** that targets the toe nails. The hallmark of autoimmune diseases is that the body mistakenly forms antibodies against part of itself. In the case of symmetrical lupoid onychodystrophy, the body forms antibodies against its toe nails and rejects them.*

*I believe the BioPreparation is helping. I started giving her [BioPreparation](#) about a month before I went to Cornell and **she hasn't lost one nail since then**; it's been about 2 months now. The others were lost quickly; another nail would immediately come loose as soon as she lost the first nail. I believe it is the BioPreparation because I didn't change anything else. The vets have since sold me some fish oil for her but that gives her diarrhea so I have stopped that. I'm sure the BioPreparation was the main factor in the slow down/stopping of her nail loss and will continue to give it to both my dogs.*

Thank you.

—Judi O.

Update (09/2008): Her new nails that have grown back look great. In fact, the vet was always amazed when she saw her nails.

*Sera, my other German Shepherd, was getting the same as Cassie—one BioPreparation capsule a day. That amount seems to stop the nail problem and her **nails are also grown back healthy**. My vet is really amazed when she looks at them, but the funny thing is that she recommended the antibiotics and Prednisone with Sera even though she saw how it had helped Cassie. So, I said no, I'd give her the BioPreparation, and it worked for her too.*

My vet isn't only amazed that Sera's nails quit falling off, but also at how fast they have grown back! She had surgery to remove one nail that was loose and wouldn't come off (and there was infection underneath even with a month of antibiotics), and the whole nail grew back SO fast!! She seems to be a very healthy girl!

Thank you again!

—Judi O.

Timex (greyhound) lost all but two toenails, but now that they are gone, he is not in any pain and seems to feel fine. The two remaining nails do not seem to be falling off so I am thinking we are at a plateau of sorts. He has been on BioPreparation-F3+ but since everything seems to have stabilized, I am switching to the maintenance formula, BioPreparation-F2+ to see how that goes. Timex will be 8 and Teddi will be 13). Teddi acts like a young dog again. Everyone remarks on how soft and silky their coats are and what pep and zest for life they radiate.

I am going to sign up for auto shipment once I see how the F-2 is working.

*Thanks again for your help and for your interest in my dog.
—Martha R.*

*I think I am on the third order of the [BioPreparation](#) for my greyhound with SLO. I have to tell you this has changed his life! He just turned 3 years old and spent most of those years being **sick, lethargic, in pain and anorexic**. **But now, he is happy, relaxed, energetic, has a great appetite, and has gained weight**. **I actually have to trim some of his nails now!***

*Farley waits by his food bowl now rather than having to be coaxed to eat, and he wags his tail like a puppy for a treat and bounds off with joy to eat. I am so happy to see him able to enjoy his life.
Thanks!
—K.D.*

(Editors Note: Notice that when all the glands and organs of the body are balanced and the whole body is experiencing wellness (not just the absence of SLO symptoms), the energy level, appetite and overall health of the pet improves. BioPreparation is [NOT a supplement](#) that treats symptoms but a holistic whole food product that wakes up the animal's natural ability to heal)

BioPreparation has no advertised ingredients specifically addressing symmetrical lupoid onychodystrophy (SLO) or autoimmune diseases. And yet look at the results customers are reporting. It is interesting to note that not even ‘supplements’ of fish oil helped. Most supplements only treat symptoms and do not holistically balance the whole body, thus chronic conditions (such as autoimmune disorders, osteoarthritis, fibromyalgia, irritable bowel symptoms) are never “fixed.” How did BioPreparation accomplish this feat?

It didn't. BioPreparation simply supplied the body with the super nutrients of Vitamins A, B-complex, C, D, E and K, essential fatty acids of Omega 3, 6, 9 and GLAs (gamma linolenic acid), over 4,000 enzymes, 20 amino acids, phytonutrients, super antioxidants, all known trace minerals and elements and thousands of other nutrients so the body could boost up and normalize the entire endocrine (glandular) system including the master glands in the brain and naturally and holistically balance the whole body. When the whole body is hormonally balanced and all the glands (e.g., adrenals and thyroid) and organs (e.g., heart, kidneys, liver) are functioning at 100%, then the immune system can return to normal. [BioPreparation](#) is such a revolutionary product (concept) it is 100 years ahead of its time. Now that's true holistic wellness!

These results are individual testimonies. We cannot guarantee your results will be the same. Since each individual body responds differently to the super nutrition in BioSuperfood?BioPreparation your results will be different. These statements have not been evaluated by the FDA.
