First Experience With Bio-Algae Concentrates

Tabby, 17 years old, 10 lbs, with Chronic Renal Failure (CRF)—kidney disease, severe arthritis

Treatment: poked twice per day with subcutaneous fluids, given Standard Process RenaFood supplement, several homeopathic pills

First week:

1. More energy, more affectionate
2. Asked to go outside, better moods
3. Increased flexibility

Bio-Algae Concentrates Saved Lives!

Case 1: white cat stopped eating, not producing red blood cells (anemic) and was dying but did not test positive for leukemia. **Vets could not diagnose the cause.**

Case 2: cat had not eaten in four days and was dying. Blood and lab tests could not find anything abnormal. **Further examination could not find anything physically wrong with the cat.**

BioPreparation® Case Study

Baby Bear— 7 yr old, German Shepherd/ Husky mix, diagnosed with mast cell cancer tumor on his paw. Vet recommended the standard protocol of cutting out the entire tumor plus a 3 cm perimeter. Radiation or chemotherapy was also recommended.

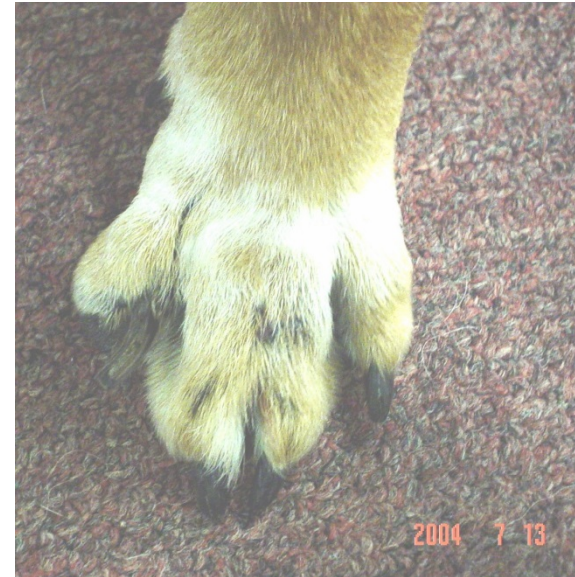

May 22, 2004 — after surgery to remove some of the mast cell tumor. Started BioPreparation® on one pinch/day.

June 5, 2004 — after 15 days on BioPreparation®
up to ½ capsule per day

July 13, 2004 — seven weeks after starting BioPreparation®
up to one capsule per day

July 31, 2004 — ten weeks after starting
BioPreparation® up to 1½ capsule per day

Baby Bear

Baby Bear, was given a clean bill of health on September 23, 2004. The vet report said, ***“Looks good. No visible recurrence of tumor. Foot regular.”***

Baby Bear was adopted on September 24, 2004.
