Holistic Resources for Mosquitos (Heartworm), Fleas and Ticks

The following are natural resources that we have found and collected from our clients for “wholistically” addressing parasites (including heartworm), flea & tick infestations and other insect pests. We have not personally used them (we live in the dry climate of Colorado) nor do we make any claims regarding these products or accept any liability for their usage. Please do your own research as only you can take responsibility for your furry children.

In our “wholistic” opinion, prevention of any infestation by feeding a species appropriate, holistic diet is one of the best tools. Dr. Robert Goldstein agrees, “Show me a dog or cat with fleas and I’ll show you an animal on the wrong diet.” (Goldstein, R, DVM, Flea-Free Forever, Phillips Pub. Inc., MD.). For our species appropriate, holistic diet principles, see our web pages:
