I manage a dog rescue in Florida and see this too many times to count. It is 98% diet related and only 2% is genetic defect. I also work for a major hospital corporation, and a private laboratory; so maybe my background can give you a small amount of enlightenment.

What type of food is consumed determines pH of the body. Urine needs to be acidic to prevent struvate/struvite crystals. Ideally slightly acidic urine is preferred (5-6 pH). Some crystals are normal and diet related but any crystals in quantity greater than "rare" are significantly diagnostic to renal (kidney) function and metabolism.

Stones occur when there is an over abundance of "solids" (calcium, phosphate, & other minerals), in the diet that are not or cannot be eliminated or removed from the bloodstream. The reasons for them to occur can vary from:

1. Constantly poor quality/improper diet
2. Chronic or severe kidney/UTI infections
3. Genetic birth defect

With the rescue dogs, we surgically remove the stones, place them on a bland diet for recovery for 5-7 days, while slowly changing their diet and add a supplement (Berry Balance from Solid Gold) to immediately alter the pH until the body recovers and tunes up. This is usually a 2-4 week process.

What bio-algae concentrates can do is give you the opportunity to remove all those impurities and toxins within her body, and then tune her up and support her assuring quality of life and optimum health and less vet visits.

I personally use the products because I believe and have seen with my own eyes how much healthier and happier my own dogs are in a very short time; and I want them to have the very best life has to offer.

We only see the vet for yearly check-up as the chronic problems are gone, and our pack has become "healthier".

Re: bladder stones or crystals in Shih Tzu breed dog

Thank you, Belinda, for an insightful and holistic viewpoint on stones, crystals and UTI. Drugs, herbs and other supplements to get rid of stones, crystals and UTI just do that and nothing more. One still has not dealt with the cause of why the stones, crystals and UTI formed in the first place. If the body is not in balance (improper pH), the elimination systems (intestines, kidneys and liver) are not functioning 100% and one is feeding an inappropriate diet to a carnivore (too much carbohydrates, sugars, chemical preservatives versus pure meat), then the body will produce lipomas, (fatty tumors), stones and crystals as a way of disposing of the toxins and waste.

Surgery, drugs, herbs and supplements will only get rid of the symptoms but not the cause of formation of stones, crystals and UTI. On the other hand, bio-algae concentrates will nutritionally support the body in order to balance the pH (whether too high or too low), make the body's elimination systems (intestines, kidneys and liver) run efficiently and nutritionally provide over 4,000 enzymes, all the essential fatty acids (Omega 3, 6, 9, GLAs, DHAs and more), all ten essential amino acids plus ten more, phytonutrients, all known trace minerals and elements, etc. that the animal is not getting in its normal diet. Bio-algae concentrates are truly waking up the animal's own natural ability to heal rather than supplementing the symptoms.

That is not to say surgery, drugs, herbs and supplements are never needed. One must take each individual case separately and decide what is necessary for that individual body. Surgery, drugs, herbs and supplements might be necessary to save the body but afterwards, one needs to take additional holistic steps to prevent their reoccurrence.

Most supplements only treat symptoms and do not holistically balance the whole body, thus chronic conditions are never "fixed." Bio-algae concentrates have no advertised ingredients specifically addressing bladder or kidney stones, crystals or UTI. It is interesting to note what an improved food diet and bio-algae concentrates (not a supplement), can do nutritionally. How did bio-algae concentrates accomplish all this?

It did not. Bio-algae concentrates simply supplied the body with the super nutrients of Vitamins A, B-complex, C, D, E and K, essential fatty acids of Omega 3, 6, 9, GLAs (Gamma-Linolenic Acids), ALAs (Alpha-Linolenic Acids), DGLA (Dihomogamma-Linolenic Acid), DHA (Docosahexaenoic acid) and more fatty acids, over 4,000 enzymes, 20 amino acids, phytonutrients, super antioxidants, all known trace minerals and elements and thousands of other nutrients so the body could boost up and normalize the entire endocrine (glandular) system including the master glands in the brain and naturally and holistically balance the whole body. When the whole body is hormonally balanced and all the glands (for example, adrenals and thyroid) and organs (for example, kidneys, bladder, liver, stomach, and intestines) are functioning at 100%, then the pH can return to normal (absence of stones, crystals and UTI). Bio-algae concentrates are such a revolutionary concept they are 100 years ahead of their time. Now that is true holistic wellness!

*These results are individual testimonies. We cannot guarantee your results will be the same. Since each individual body responds differently to the super nutrition in bio-algae concentrates your results will be different. These statements have not been evaluated by the FDA.
